Wicker cradle

ERGO-rocking-wicker-cradle

The unique shape of the **ERGO-rocking-wicker** cradle makes it possible to enjoy a closer and more comfortable contact to the child. The parents are over the cradle's centre without leaning far forward, which makes it easier to lift the baby into the cradle and out of.

- ♦ **Suspension:** the 4 hemp ropes have loops at each end. Those can be hooked to a beam at the ceiling or stand, or tied on to a tree in summer.
- ♦ The **length of the ropes to hang up the cradle** can be adjusted to the parents' height: dealing with the newborn won't be so bad anymore for the adults' back.
- ♦ Through **movements of the baby** the cradle starts to swing which will be controlled by the baby.
- ♦ The cradle can **swing** length- or sideways depending in which way the cradle is fixed.
- ♦ When the child grows bigger and is able to stand up, the cradle can be lowered so the child can **get out** on a mattress laid below. The cradle can also be used for 2 year-old children as a little bed.
- ♦ The cradles are built very robust, so they can also be used as a **swing for bigger children** up to 10 years or as a play-house, play-boat ...

measurements and prices

(including VAT and 4 hemp ropes each 2 m long)

standard size

bottom	75 x 45 cm	
heights and width	105 x 60 cm.	
	40/50 cm high	390.- €

rocking-wicker bed for twins

bottom	80 x 90 cm
